Simple solutions for Lavalier microphones

'Consumables', 'disposables', 'expendables'... they go by many names and they are those single or limited use items that sound pros use for sticking, fixing, hiding or protecting lav mics. Rycote products made for these uses will now be known as 'Essentials'!

We know that, whilst these products are by their nature 'throw-away', they are an integral part of your craft - and crucial for getting the job done.

Rycote Stickies, Undercovers and Overcovers are established as the 'industry standard' for use with lav mics. We've listened to what our customers have told us and are delighted to introduce new 'Advanced' versions of the Stickies and Overcovers for 2017!

Stickies, Advanced

Double-sided, hypoallergenic, adhesive pads used to affix lavalier microphones directly onto skin or on top of clothing.

- Stickier hypoallergenic adhesive on both sides;
- Supplied loose with easy peel-off tabs to make use easier;
- **Round** - larger diameter means perfect for use with the ever-popular DPA Concealers;
- **O's** - allow wind protection on DPA Concealers, or folded-over with Overcovers;
- **Squared** - perfect for use with Sanken RM-11 (the rubber mount produced for the Sanken 'COS-11' mic) & for general cable management on radio mics.

Overcovers, Advanced

Overcovers utilise Rycote exclusive fur technology, providing excellent wind-noise protection for lavalier microphones. They consist of a discreet, fur covering and are supplied with Stickies.

- Bigger size (26mm) to match the DPA Concealers;
- Supplied with Stickies Adv Round, at 23mm also bigger than 'Originals';
- Introducing new beige colour - to cater for even more applications.
